

## STORY OF CARMEN, PUPANA WOMEN'S GROUP

CARMEN SINCHIGUANO, 40 years old, single, belongs to the Women's Group of the Pupana Sur community, an organization that has been working with FEDICE for 13 years. The group is made up of 19 families, and they meet once a month for training and project monitoring.

Carmen started with the production of cattle, she changed production to pigs, guinea pigs and rabbits. Because she needs to go every day to Machachi, when Marco, our technician verified her production, his father Mr. Miguel Sinchiguano show us her productions, in this case the cow that Carmen bought with the loan from FEDICE.

She is very responsible in paying her loans, in this way she continues to receive internal credits from the organization to increase her business.

Currently Carmen has a small shoe sales business in a leased place in Machachi, located an hour away from Pupaná.

Carmen thanks FEDICE for the support in the different projects in these 13 years. For the theoretical and practical training received on the proper breeding of animals.

Thanks to the brothers and sisters from the United States for supporting us, we ask God for your lives and in this pandemic we ask, please take good care of yourselves.

Our commitment is to continue working and we ask our colleagues from FEDICE and our brothers and sisters from the United States, please continue helping us for going ahead with our projects, in my case to continue increasing the sale of shoes.

God bless you all.
